<b>Office Action Summary</b>	<b>Application No.</b> 10/596,298	<b>Applicant(s)</b> BERGER ET AL.	
	<b>Examiner</b> Scott A. Smith	<b>Art Unit</b> 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

The amendment filed on 7/23/09 has been entered and the remarks therein have been considered.

#### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harada et al. '466 or UK Patent Application '045 in view of Leining '150.

Harada et al. '466 discloses the percussion drill hammer as claimed comprising a hammer housing 1, 15, a handle device surrounding at least a portion of the housing and including a handle 2, 12, and a guide device including rolling elements 4 effectively "fastened" between the hammer housing and the handle device located laterally on the housing, as broadly claimed, and effecting a spring characteristic transverse to a working direction, wherein the guide device allows relatively uninhibited movement of the handle relative to the housing in a working direction and inhibits lateral and rotational movement between the handle and housing, as broadly claimed.

UK Patent Application '045 discloses the percussion drill hammer as claimed comprising a hammer housing 1,3, a handle device including a handle 2 with guide portions 2a which overlap an outer surface of the housing portion at 3, and a guide device including rolling elements 7 effective between the hammer housing and the

Art Unit: 3721

handle device in an intermediate space and located laterally on the housing and movable along "track" 2b of the handle device, as broadly claimed, and effecting a spring characteristic transverse to a working direction, wherein the guide device allows relatively uninhibited movement of the handle relative to the housing in a working direction and inhibits lateral and rotational movement between the handle and housing, as broadly claimed.

Harada et al. '466 and UK Patent Application '045 lack the specifically claimed rolling elements and "tracks". Leining '150 discloses a related reciprocating tool 89 comprising a carriage guided reciprocally upon a tool base, and a guide device including rolling members 28, 30 in cooperating tracks between the tool and base, in the shape of prisms (Note: Figs. 3 and 4) and mounted on axles. In view of the teachings of Leining '150, it would have been obvious to one skilled in the art to provide the devices of Harada et al. '466 or UK Patent Application '045 with the specifically claimed rolling elements and tracks for the guide arrangement in order to more effectively guide the elements.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3721

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott A. Smith whose telephone number is 571-272-4469. The examiner can normally be reached on 5:30-4:00 Tues.-Fri..
